

NeuroHERO Assist Trial

5-Stage Trial Plan – Co-design. Test. Improve. Together.

We're inviting real users, families and support teams to help shape the future of NeuroHERO Assist.

1

Discover & Onboard

- Intro session & goals
- Understand needs, strengths & preferences
- Set up Assist together
- Agree on what success looks like

2

Personalise & Explore

- Personalise communication methods & supports
- Explore features together
- Practice in safe settings
- Build confidence

3

Use in Real Life

- Use Assist in everyday routines & environments
- Try features that help most
- Capture moments that matter

4

Feedback & Learn

- Share what's working well
- What could be better?
- Ideas for new features or changes
- Clinician & team review

5

Improve & Evolve

- We refine and improve based on your feedback
- New builds & updates
- Continue the cycle together

Key Features We'll Explore Together

Communication
Speak, text or use symbols

Gestures
Understand and use hand signals

Voice & Listening
Hear, understand and be understood

Emotions
Express feelings and understand emotions

Calm & Regulate
Breathing, focus and calm tools

Routines & Tasks
Stay on track, one step at a time

Timers & Alerts
Gentle reminders that help

Support & Connection
Ask for help and stay connected

Independence
Tools to help you do it your way

Your experience shapes the future.

Together we can build Assist to empower communication, confidence and connection.

Co-designed
Your voice matters at every step.

Safe & Supported
You're in control. We're here to help.

Real Impact
Better tools. Better support. Better everyday outcomes.
